Formal Languages Side Meeting

15 May 2020
Virtual Side Meeting

Formal Languages in the IETF

- Lots of interesting projects, spread across various groups, aligned with different technical challenges
- No group to address the broad, overarching principles, issues, and solutions
- Is there an appetite for a formal languages group in the IETF/IRTF?
- This meeting: look at some of the FDT projects in the IETF, start to think about the common issues, try to identify the basis for future work

Logistics

- Mailing list:
fdt@ietf.org
<https://www.ietf.org/mailman/listinfo/fdt>
- Etherpad:
<https://pad.riseup.net/p/fdt-150520>
- The meeting is being recorded and minuted, with the attendee list noted: will circulate on the list after the meeting

Agenda

- Introductions
- Talks
- Discussion

Introductions

Introductions

- Who you are
- Why you're here
- What formal languages projects are you interested in or working on

Talks

Discussion

Discussion

- What are the common issues around formal languages?
- Is there sufficient work to justify a formal languages group?
- What is the scope of any formal languages group?
- Does the proposed work align better with the IETF or IRTF?

Discussion

- Next steps
